SUMMARY

Security-first engineer who builds and tests systems. Two years of hands-on penetration testing (APIs, web apps; 5–10 assessments) plus backend and LLM development in Python, Node.js, and React. Combines offensive security skills (OWASP Top 10, SQLi, IDOR, auth flaws) with shipping secure code: optimized database queries by 30%, reduced container images by 40%, and improved LLM model accuracy through A/B testing and prompt engineering.

EXPERIENCE

Menas Cyber Solution Feb 2024 – Jan 2026

Backend Engineer Jan 2025 – Jan 2026

AI-powered productivity application (sessions, tasks, analytics)

- Built Node.js/Express REST APIs for task and activity management; implemented JWT authentication and role-based access control.
- Optimized database queries by ~30% using composite indexes on PostgreSQL and connection pooling to reduce peak-traffic CPU load.
- Reduced container image size by ~40% with Docker multi-stage builds.

Penetration Tester Feb 2024 – Mar 2025

Web and API security assessments

- Completed 5–10 API and web application penetration tests; identified critical and high-severity vulnerabilities including SQL injection, XSS, IDOR, SSRF, command injection, file inclusion, and authentication bypasses.
- Tested session management, privilege escalation, and API authorization using Burp Suite, SQLMap, Nmap, ffuf, and Gobuster.
- Wrote clear reports with reproduction steps, severity ratings, evidence, and remediation guidance.

Revelo Feb 2025 – Jan 2026

AI Engineer

- Built Python (Django/FastAPI) and React features connecting LLMs to application data for text generation and content processing.
- A/B tested model variants using different prompt engineering strategies; improved model accuracy through iterative refinement and validation.
- Enhanced output reliability via prompt design, input validation, error handling, and secure LLM API communication.
- Worked with MongoDB and PostgreSQL; collaborated on testing, debugging, and code reviews.

EDUCATION & PROJECTS

B.Sc. Computer Science and Engineering 2021 – 2026

Adama Science and Technology University, Adama, Ethiopia

AACP (Graduation Project)

Collaborative ad campaign management platform built with Node.js/Express, React, and MongoDB. Enables teams to create, manage, and track ad campaigns in real time.

SKILLS

Application Security: Web & API penetration testing · OWASP Top 10 · authentication & authorization testing · vulnerability assessment · source code review · security scripting

Security Tools: Burp Suite (Repeater, Intruder, Scanner) · SQLMap · Nmap · ffuf · Gobuster

Development: Python · JavaScript/TypeScript · SQL · Node.js/Express · Django · FastAPI · React · REST APIs

Data & Infrastructure: PostgreSQL · MongoDB · Redis · Docker · AWS · Linux · Git · CI/CD

AI/LLM: LLM API integration · prompt engineering · A/B testing & evaluation

CERTIFICATIONS & ACHIEVEMENTS

- CyberShield Showdown CTF, 3rd place
- Cisco Certified Network Associate (CCNA v7)
